

## **Working Prototype**

Bankroll Breakdown

TECS

3/17/17

### **Known Bugs:**

- When filling out the New Game form, since Location and Date are strings. There is no limitation to the input the user chooses to write.
- Location could be filled out anyway they like. Symbols, numbers, letters, etc.
- Date is the same way. We produce a Keypad, but the user could input two “..”s and submit it still.
